Section VII - Precautions for Safe Handling and Use	
Steps to be taken in case material released or spilled: Toothpaste is generally used for personal hygiene and general household purposes. Release to sanitary sewer in small amounts is inherent in end use. Small amounts may be dissolved in water and flushed into sanitary sewer. Larger quantities should be transferred to containers. In the event of molten toothpaste, contain the spill using a barrier of inert material such as sand or by diking the area. Let the material cool and harden, then physically remove to containers.	
Waste disposal method: Foot Powder is a non-hazardous biodegradable material. Small amounts can be dissolved in water and flushed to sanitary sewer. Larger amounts should be disposed of in accordance with local, state and federal regulations.	
Precautions to be taken in handling and storage	None
Other precautions	Store in dry area
